

## Contents

Mathematics of the Verification and Validation in Computational Engineering .....	5
<i>Babuška Ivo</i>	
Virtual Reality – Symbiosis of Science and Art .....	13
<i>Bulirsch Roland</i>	
Professor Karel Rektorys' 80 <sup>th</sup> Anniversary of his Birth .....	21
<i>Marek Ivo</i>	
Bounded Solutions of Discrete Equations .....	28
<i>Baštinec Jaromír, Diblík Josef</i>	
Solution of a Free Boundary Problem Arising from Chemical Kinetics .....	33
<i>Batens Nicholas, van Keer Roger</i>	
Mean Curvature Flow and Its Numerical Treatment .....	38
<i>Beneš Michal</i>	
Large Scale Modelling in Geomechanics: Elasticity, Thermo-Elasticity and Iterative Solvers .....	43
<i>Blaheta Radim, Byczanski Petr, Starý Jiří</i>	
On a Worst Scenario Problem for a Volterra Integral Equation Modelling Visco-elastic Problems .....	48
<i>Bock Igor, Lovíšek Ján</i>	
On the Prediction of Complex Atmospheric Flow .....	53
<i>Bodnár Tomáš, Sládek Ivo, Kozel Karel, Beneš Luděk, Jaňour Zbyněk</i>	
Derivation of Formulas for Projections for Variational Type of Projection .....	58
<i>Bořík Milan</i>	
A Parabolic Problem with an Integral Condition and the Rothe-Method Approximation .....	60
<i>Bubeník František</i>	
Geodetic Systems of Industrial Measurements and Their Modifications .....	64
<i>Bubeník František, Hánek Pavel</i>	
Refinement of FEM Mesh Adjusted to Singularity and Application to 2D Flow Problem .....	68
<i>Burda Pavel, Novotný Jaroslav, Jelínek Michal</i>	
A Second Order Approximation Scheme for the Micromagnetic Landau-Lifshitz Equation .....	75
<i>Cimrák Ivan, Slodička Marián</i>	
One Application of a Two Sheet hyperboloid .....	80
<i>Černý Jaroslav, Kočandrlová Milada</i>	
Computer Modeling of Pulsed Laser Processing of CDZNTE .....	85
<i>Černý Robert, Přikryl Petr, Gatskevich Elena</i>	
Departure Time Distribution in PH/PH/1 Queue .....	90
<i>Dohnal Gejza, Meca Martin</i>	
Scalable FETI with Optimal Dual Penalty for Variational Inequalities .....	95
<i>Dostál Zdeněk, Horák David</i>	

Refining Procedure for a Triangular Grid on a Sphere .....	101
<i>Douchová Veronika</i>	
eLearning Teaching Aids for Constructive Geometry .....	104
<i>Dvořáková Hana</i>	
Smooth Continuation for a Model of Unilaterally Supported Beam .....	108
<i>Eisner Jan, Kučera Milan, Recke Lutz</i>	
Numerical Simulation of Transonic Flow – Internal Aerodynamic Applications ....	113
<i>Fořt Jaroslav, Halama Jan</i>	
Numerical Solution of Different Models of Internal Transonic Flow .....	118
<i>Fořt Jaroslav, Kozel Karel</i>	
TVD and ENO Schemes for Transonic Flow Calculations .....	123
<i>Fürst Jiří, Kozel Karel</i>	
Capacity Analysis of Two-line Highways .....	134
<i>Hála Martin</i>	
Statistical Analysis of Traffic Accidents .....	137
<i>Hála Martin</i>	
Abstract Theory of Oscillations .....	142
<i>Herrmann Leopold</i>	
Dual-porosity Transport Model in Underground Water Remediation .....	148
<i>Hokr Milan, Maryška Jiří</i>	
Dynamical and Aeroelastic Effects in a Numerical Solution of Flow through a Cascade and over a Profile .....	152
<i>Honzátko Radek, Horáček Jaromír, Kozel Karel</i>	
Cost and Benefit Criteria in Methods Based on Distances from Ideal and Negative Ideal Variants .....	157
<i>Houška Milan, Dömeová Ludmila</i>	
Coupling the Worst Scenario Method with Fuzzy Input Data .....	162
<i>Chleboun Jan</i>	
Join Space of First-order Linear Partial Differential Operators with Compatible Proximity Induced by a Congruence on Their Group .....	166
<i>Chvalina Jan, Hošková Šárka</i>	
On the Lattice of Hereditary Preradicals .....	171
<i>Jirásko Josef</i>	
Numerical Analysis of Wave Solutions in Reaction-Diffusion Systems .....	175
<i>Kohout Martin, Schreiber Igor, Kubíček Milan</i>	
Approximated Representations Based on Complete Families of 2D and 3D Nonpolynomial Shape Functions .....	181
<i>Kolesnicov Ilya</i>	
Interval Solutions of Interval Linear Systems .....	186
<i>Koníčková Jana</i>	
Gas Exchange Modelling During Artificial Lung Ventilation with Tracheal Gas Insufflation .....	192
<i>Kopelent Vít, Roubík Karel, Zábrodský Vladimír</i>	

Numerical Modeling of a Various Cardiovascular Problems of a Flows .....	197
<i>Kozel Karel, Prokop Vladimír, Keslerová Radka</i>	
Open Problems in the Theory of the Navier-Stokes Equations with Mixed Boundary Conditions .....	202
<i>Kučera Petr</i>	
The Minimum Spanning Tree Approach to the Multiplétours Traveling Salesman Problem .....	207
<i>Kučera Petr, Beránková Martina</i>	
Interpolation Add-in for MS Excel .....	211
<i>Linkeová Ivana</i>	
Lagrangian Composite Schemes on Triangular Unstructured Grids .....	216
<i>Liska Richard, Shashkov Mikhail, Wendroff Burton</i>	
Reliable Solution with Respect to Free Vibration of Plate .....	221
<i>Lovišek Ján, Bock Igor</i>	
Fast Benchmark Solver for Direct and Inverse Transport Problems in Basic Dual-well Flows .....	227
<i>Malengier Benny</i>	
Modelling of Cable Stayed Bridges .....	232
<i>Malík Josef</i>	
Dirichlet Problem for the Laplace Equation in a Cracked Domain with Jump Conditions on Cracks .....	238
<i>Medková Dagmar</i>	
A Generalisation of the Damped Least-Squares Method .....	242
<i>Mikš Antonín, Novák Jiří</i>	
Method for Fast Numerical Calculation of Diffraction Integrals .....	245
<i>Mikš Antonín, Novák Jiří</i>	
Methods for Wavefront Approximation .....	250
<i>Mikš Antonín, Novák Jiří</i>	
Image Transformation by means of Degenerate Parabolic Equations of Hamilton- Jacobi Type .....	255
<i>Minárik Vojtěch, Beneš Michal</i>	
On Some Problems Connected with Interval Linear Program .....	260
<i>Mráz František</i>	
Equivalence of $l^{(p_n)}$ Norms .....	265
<i>Nekvinda Aleš</i>	
Smoothness Versus Discreteness .....	272
<i>Neuman František</i>	
The Spectrum of the Rate of Deformation Tensor and Regularity of a Solution to the Navier-Stokes Equation .....	277
<i>Neustupa Jiří, Penel Patrick</i>	
Visualization Techniques in Mathematical Engineering .....	281
<i>Petřek Martin</i>	
Integrodifferential Parabolic Problems with a Subsidiary Conditons .....	286
<i>Pultar Milan</i>	

Multilevel Treatment of Second Order PDE's with Variable Coefficients .....	291
<i>Pultarová Ivana</i>	
Mathematical Assessment of the Image Quality .....	295
<i>Roubík Karel, Dušek Jaroslav</i>	
Respiratory Simulations Using Mathematical Model of the Human Respiratory System Corresponding with Its Anatomical Structure .....	299
<i>Rožánek Martin, Roubík Karel</i>	
On Weakly Projective and Weakly Injective Modules .....	303
<i>Saleh Mohammad</i>	
Rothe Method and Method of Lines. A Brief Discussion .....	316
<i>Segeth Karel</i>	
Finite Element Approximation of a Contact Vector Eigenvalue Problem .....	321
<i>de Schepper Heine, van Keer Roger</i>	
Boundary Regularity of Weak Solutions of the Navier-Stokes Equations .....	326
<i>Skalák Zdeněk</i>	
Regularity of Pressure in the Navier-Stokes Equations .....	333
<i>Skalák Zdeněk, Kučera Petr</i>	
Numerical Simulation of Cardington Fire Test on Structural Integrity .....	339
<i>Sokol Zdeněk, Wald František, Pultar Milan, Beneš Martin</i>	
Simulational Study of Cardiac Cell Contractility .....	344
<i>Sousedík Bedřich</i>	
On a Problem with Nonlinear Boundary Conditions .....	350
<i>Sváček Petr, Najzar Karel</i>	
Singular Problem for Nonlinear Integro-differential Equations Depending on a Parameter .....	355
<i>Šmarda Zdeněk</i>	
Method of Discretization in Time and Two-scale Convergence for Nonlinear Problems of Engineering Mechanics .....	359
<i>Vala Jiří</i>	
Linear Partial Difference Equation of a Discrete Waveguide .....	364
<i>Veit Jan</i>	
Mathematical Model of IC Engine - Advanced Multizone Eulerian Model .....	370
<i>Vítek Oldřich, Polášek Miloš, Macek Jan, Kozel Karel</i>	
Modelling of a Semiactive Damping Wheel .....	375
<i>Vondřich Jiří, Znamenáček Karel</i>	
Variational Characterization of Eigenvalues of Nonlinear Eigenproblems .....	379
<i>Voss Heinrich</i>	
Computer Simulation of Thermal Dynamic Behaviour of Buildings by means of RC Models .....	384
<i>Vytlačil Dalibor</i>
